

Welcome to RECKLI – Your Expert for Perfect Exposed Concrete

In the world of exposed concrete, RECKLI stands for innovation, quality and sustainable solutions.

With our decades of experience, we support the concrete processing industry, especially precast plants, in turning their visions into reality.

Our extensive product portfolio offers everything you need for the production, maintenance and finishing of your concrete projects – all from a single source, Made in Germany.

Customized solutions for the concrete processing industry

Mold Making &
-maintenance

Separating &
Demoulding

Products for
Formwork

Washing, Acidify-
ing & Cleaning

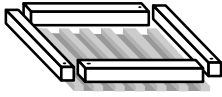

Protecting &
Impregnation

Concrete Repairs
& Bonding

Mold Making & -maintenance

Our elastomers with the highest requirements in terms of workability, detail reproduction and resilience. The suitably formulated barrier paste makes the creation of barriers child's play.

Adhesives and cleaners round off the mold making portfolio and guarantee you many smooth applications.

Elastic Polyurethane-Elastomers

- SR 30
- A 45
- A 60
- A 70

Accessories

- Stop Off Paste PUR

Mending and Repairing molds

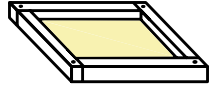

- Elasto-Filler
- RECKLI Toolkit

Bonding of the Molds

- Formliner Adhesive

Cleaning of the Molds

- Formliner Cleanser

Products for Formwork

Formwork places high demands on precision and material. Our sealant prevents unwanted reactions with the material and thus ensures the best possible concrete finish.

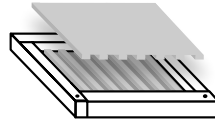

Flex filler is perfect for repairing holes, cracks, depressions, unevenness and butt joints.

Preparation of model surfaces

- PUR-Sealant (EK-PU-Thinner)
- PUR-Sealant LI (below the legal limits for monomeric diisocyanates, applicable without prior training)

Filling of Holes

- Epoxy Flex-Filler

Separating & Demoulding

Our specially formulated release agents ensure the safe and residue-free separation of the formwork from the hardened concrete.

They are constantly tested with the most modern concrete formulations and under the most diverse conditions and prove themselves both in the precast plant and in in-situ concrete.

Release waxes for demolding concrete elements

- TL
- TL-Eco
- TL-SO
- TL-W

Mold wax for demolding plastic molds

- Mould Wax

Washing, Acidifying & Cleaning

RECKLI deactivators and acidifying products offer a wide range of washout depths for the production of washed-out concrete surfaces.

They guarantee a homogeneous washout pattern with low consumption and without environmentally harmful residues. We offer products for washing out in positive and negative processes.

Surface retarder in the negative process

- CR Typ N
- CR Typ N-WB

Surface retarder in the positive process

- CR Typ PV

Washing gel

- Cemgel K
- Cemgel KS

Cleaning agent for removing cement residue

- Cleanser 64
- Concrete Cleaner

Protecting & Impregnation

Impregnation and protection systems protect exposed concrete surfaces against moisture, dirt and graffiti.

RECKLI surface protection impregnates exposed concrete either colorless or with an optical effect. The graffiti protection system prevents damage caused by vandalism.

Antigraffiti

- Graffix Basic

Surface Treatment

- OS D
- OS HO
- OS Intensiv
- OS Premium
- OS W

Concrete Repairs & Bonding

Two-component filler for repairs and bonding work. The product is suitable for cementitious substrates and steel surfaces.

It enables unevenness, holes and imperfections in floors and walls to be filled. Epoxi LS has even proven its worth when bonding large-format concrete components.

For cementitious substrates and steel surfaces

- Rapid Epoxy Type LS
